- : Flotation Foam

The Classic GH-40 Spray Foam and Coating Machine is the Flag ship of the PMCs Classic Series line, engineered to perfection, with its unique design to handle a wide range of high volume plural component applications, and where high end performance and output is needed, the GH-40 puts a whole new meaning to the word production! When used in conjunction with automated spray robotics, the GH 40 will far exceed above and beyond your expectations. The GH-40 Spray Foam & Coating Machine is a plural component proportioning system that will give you superior performance time and time again, built with the customer in mind! Made in the USA. When the GH-40 is combined with the hands on training provided by Sprayworks, you can be assured you will be trained by our certified experts that specialize in multiple types of fluid applied systems.
