

PMCA Foam & Coating Machine

The Classic PMCA Series Spray Foam & Coating Machine is the heart and sole of any plural component spray business. The PMCA is uniquely designed with double ended piston air driven motor to ensure pressure stability throughout pumping cycle. Engineered for performance and longevity with the customer in mind! Giving you an air driven proportioner unit with a horizontal metering pump line system built to last, user friendly and Made in the USA.

The PMCA is already in production and is expected for distribution in June. SprayWorks Equipment Group is the largest PMC distributor in North America and the leader in application technology.

Features:

- : Air Driven
- : Open Frame Design
- : 20lb/min output
- : 1600 or 2400 PSI
- : 7.5Kw Heaters
- : Digital Temperature Controls

Applications:

- : Residential Insulation
- : Commercial Insulation
- : Small to Medium projects
- : Polyurea
- : Plural Component Coatings
- : Bed liners
